

Crisis Delivery to Success at Breast

presented by Lisa Brock, January 2007

Discuss the strategies designed to manage premature mothers concerns about breastfeeding and the feeding of their breastmilk using evidence based practice.

1. The rewards of breastfeeding their preterm infant(s).
2. Knowing they are providing the healthiest nutrition for their infant(s).
3. Enhancing mother's closeness to her infant(s).
4. Perceiving infant(s) contentment and tranquility during breastfeeding.
5. Giving mother tangible claim on their infant(s).

A discussion of the many benefits of breastmilk to their child.

Use of the Creatocrit with mother's breastmilk.

Providing hindmilk feedings to lactoengineer mother's milk for the Very Low Birth Weight and other infants who have specific nutritional needs.

Providing education to families using evidence based knowledge/practices.
Breast milk is the optimal nutrition for the infant.
