

CLINICAL NURSE SPECIALIST

MATERNAL/CHILD

If you excel in your field, both technically and interpersonally, we invite you to become a part of our tradition of excellence. St. Mary's, a multi-specialty teaching hospital known for its superior practice environment and quality of care located in Madison, Wisconsin is seeking an experienced, innovative and enthusiastic individual with a can do attitude about the future of nursing and HEALTHCARE. Our progressive Nursing Organization operates within a mature Shared Governance model and is one nursing organization in the country to be both Magnet recognized and a recipient of the Malcolm Baldrige National Quality Award.

Qualified applicants must have a Masters Degree from a Clinical Nurse Specialist program and at least a minimum of five years experience in maternal/child nursing including High Risk Perinatal nursing. Lactation Consultant Certification, experience in a Shared Governance environment and in the CNS role would be considered assets.

You will work in partnership with director(s) and clinical staff to assure the development of expertise necessary to respond to ever changing technology and complexity within Maternal/child services. You will have a primary leadership role in assuring the highest standards of clinical practice throughout the maternal/child service.

As a member of the CNS team you will provide organization wide leadership for major clinical initiatives. The practice, consultation, education and resource components of your role will all be integral to the development of the nursing organization.

We provide a comprehensive fringe benefit package, excellent salary and the opportunity for professional and personal growth.

Interested applicants should apply on line at: diane_vento@ssmhc.com, or call 262-754-5021. Thank you.
